

THARUN KUMAR DODDI

Full-Stack Engineer | Java, Spring Boot, Angular, Microservices

Hyderabad, India | +91 7416186364 | tonitharun@gmail.com | linkedin.com/in/tharun-full-stack-developer/

PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with 4+ years of experience delivering scalable enterprise applications across banking and healthcare domains. Skilled in Java, Spring Boot, Angular, Apache Kafka, and Apache Ignite, with a track record of cutting system latency by 70% and modernizing legacy platforms. Oracle Certified Java SE 8 Associate.

PROFESSIONAL EXPERIENCE

Full Stack Developer, IntouchCX

Jan 2025 - Present | Hyderabad, India | Client: ComPsych

- Architected and developed a full-stack web application using Angular and Spring Boot, ensuring seamless integration and optimal performance across services.
- Implemented Google OAuth2 authentication and built HTTP interceptors for automated JWT token refresh; integrated Spring Data JPA with MS SQL Server for robust data persistence.
- Designed Angular Reactive Forms with extensive validation, leveraging Angular Signals and Route Resolvers for state management and pre-loading of data.
- Led migration of legacy SOAP services to REST APIs, modernizing service integrations and improving interoperability across the stack.
- Migrated the distributed caching layer to Apache Ignite for reference data and session storage, improving cache performance and reliability across high-throughput pipelines.
- Led platform upgrade from JBoss 7 to JBoss 8 alongside a Java 11 to Java 21 migration, delivered with zero downtime.
- Established CI/CD pipelines using Jenkins and Docker; implemented frontend test automation with Karma, Jasmine, and Protractor.

Full Stack Developer, Virtusa Consulting Services

Jun 2022 - Jan 2025 | Hyderabad, India | Client: Citi Bank

- Architected real-time, event-driven data pipelines using Apache Kafka to decouple external loan-application intake from time-intensive backend processing, reducing system latency by 70%.
- Engineered high-performance data processing applications using Apache Commons Diff-Builder and the Java Stream API to aggregate and transform data from REST APIs and databases.
- Developed a custom ORM framework using the Java Reflection API for dynamic entity mapping and annotation processing, streamlining legacy database interactions.
- Designed enterprise-grade validation frameworks via the Java Reflection API, adopted as a cross-team engineering standard across multiple projects.
- Architected scalable Spring Boot microservices with Spring Cloud load balancing and horizontal scaling, successfully handling a 200% traffic surge.

TECHNICAL SKILLS

Languages: Java 21, JavaScript, Python

Frontend: Angular, Reactive Forms, Angular Signals, Route Resolvers, HTTP Interceptors

Backend: Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, REST API, JWT, OAuth2

Architecture: Microservices, Event-Driven Architecture, Distributed Caching, SOAP-to-REST Migration, RESTful API Design

Messaging and Data: Apache Kafka, Apache Ignite, MS SQL Server, MySQL, Oracle PL/SQL

Testing: JUnit, Mockito, Karma, Jasmine, Selenium WebDriver, Protractor (legacy)

DevOps and Cloud: Docker, Jenkins, CI/CD, Git, AWS, Google OAuth2

Practices: Agile Development, Unit Testing

EDUCATION AND CERTIFICATIONS

B.Tech, Engineering - JNTUK, University College of Engineering, Narasaraopet

GPA: 7.25 / 10.0 | Jun 2018 - Jun 2022

Oracle Certified Associate, Java SE 8 Programmer - Valid from Nov 2022
